

The Fiducinvest project is a next-gen financial ecosystem created by the FiducInvest group, a fin-tech company with outstanding past performance on financial markets that offers various investment services and advanced technological solutions for trading and investing. Multiple years of experience have allowed Fiducinvest and its team of experts with in-depth experience across different fields to develop successful investment strategies, create their own modern proprietary investment and trading software, and gain considerable expertise in financial market research, risk management and navigating various investment assets.

With the introduction of the FINV security token, the Fiducinvest company is opening the doors to its full-fledged financial ecosystem for every investor, including retail. The project combines under one roof its trading and investment strategies on the financial markets, the FI Alternative Value Fund that offers outstanding risk-to-return ratio, the modular trading software JARVIS ® based on Artificial Intelligence, Automated Machine Learning and Big data technologies, an investment management platform, as well as various retail investment products. These products will be generating profit in various ways - from financial gains of the investment assets to performance and management fees for the fund and licensing fees for JARVIS ® - which will be paid out to investors as dividends on a regular basis.

● **The ecosystem** ●

 <p>Trading and investing</p> <p>The FINV token will allow investors to tap into the outstanding returns of more than 80% we have achieved on the financial markets over the last several years.</p>	 <p>The FI Alternative Value Fund</p> <p>The FINV security token will allow investors to participate in the performance and management fees generated by the FI Alternative Value Fund.</p>	 <p>JARVIS ® - modular trading software</p> <p>AI-based modular trading software that will generate licensing fees from core target groups such as private banks and investment companies.</p>
 <p>Investment management platform</p> <p>The investment management platform will allow brokers and investment companies to manage customers' portfolios against fees paid to Finvestify.</p>	 <p>Retail investment products</p> <p>Various investment products for retail and their associated fees will contribute towards the revenue generated by Finvestify.</p>	 <p>CHF and EUR-backed stablecoins</p> <p>Two fiat-backed stablecoins backed by Euro and the Swiss franc. Transparent audit of funds by the custodian party and additional revenue for Finvestify through fees.</p>
